UPLIFTING LOCAL WOMEN ENTREPRENEURS

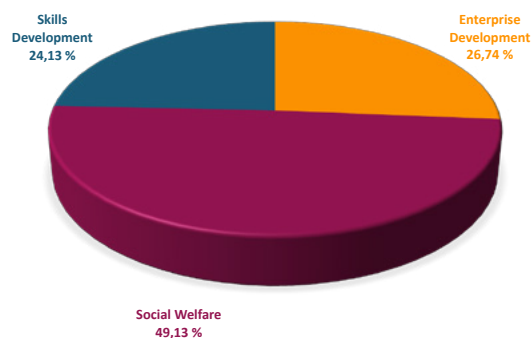

A group of aspiring women entrepreneurs from Mmakau recently received vital support through our ongoing Hearts and Minds flagship initiative, which focuses on uplifting communities through sustainable socio-economic development.

Forming part of the Moagi Women Development Cooperative, the women taught themselves how to produce and sell bricks to help meet local demand in the construction sector. In recognition of their efforts and the potential for growth, De Wildt Solar stepped in to provide essential resources, including office furniture, landscaping sand, cement, and a skid steer.

This support has enabled the cooperative to expand its operations, improve productivity, and generate income, creating new opportunities not just for the women involved but for the broader community as well.

SOCIAL WELFARE SUPPORT RESTORES DIGNITY

Between April and June 2025, we implemented a social welfare initiative to support communities affected by severe weather earlier in the year.

Motlhake Primary School in Mmakau was one of the hardest hit, with storm damage leaving 614 learners without water or sanitation. In response to a request from the school, De Wildt Solar provided four VIP mobile toilets for a three-month period.

This support helped ensure learners and teachers had access to safe, hygienic facilities, restoring dignity and supporting a healthier learning environment.
